SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Coastal Region

Paul's Slide, State Route 1, Monterey County

Per Cal OES Coastal Duty Officer (CDO), as of 1300 hours on 05/25/17, Paul's Slide on State Route 1 has been closed to all traffic.

- Caltrans engineers report slide activity and the area has been closed in the interest of public safety.
- Assessment will commence and further details will be provided once released.
- All deliveries and local access previously scheduled have been suspended.

Mud Creek Slide, State Route 1, Monterey County

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- The Mud Creek area is ¼ mile in length, made up of five slides, four of which fell during this single incident and consolidated into one slide. The remaining slide now extends 1,500 feet in length over State Route 1 and is about 35 to 40 feet deep.
- Roadwork at Mud Creek was suspended and heavy equipment removed last week due to the threat of new slides and for safety of highway workers. Caltrans geologists and engineers plan to assess it further when this area stabilizes.
- There is no estimate when this section of State Route 1, approximately nine miles north of the San Luis Obispo/Monterey County line will re-open.

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Placer County: Truckee River at Truckee
- Alpine County: East Fork Carson River at Markleeville, West Fork Carson River at Woodfords

Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>

Cal OES Southern Region

River Forecast - The following river is forecast to meet or exceed Flood stage:

Mono County:

- West Walker River at US 395 Below Little Walker is forecast to exceed flood stage at 6.2 feet the morning of 06/04/17.
 - Potential Impacts: Some minor flooding of lowlands, pastures, and rural roads.

Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>

Key Points

06/01 – 06/07

Thursday-Wednesday

- Snowmelt continues and temperatures will warm again over the weekend, which may cause additional localized flooding on area creeks, streams and rivers
- Rivers will continue to be cold and fast, presenting a hazard to swimmers

Saturday-Sunday

- Warm weekend with possible heat risks for sensitive populations over portions of southern CA

WEATHER SYNOPSIS BY REGION

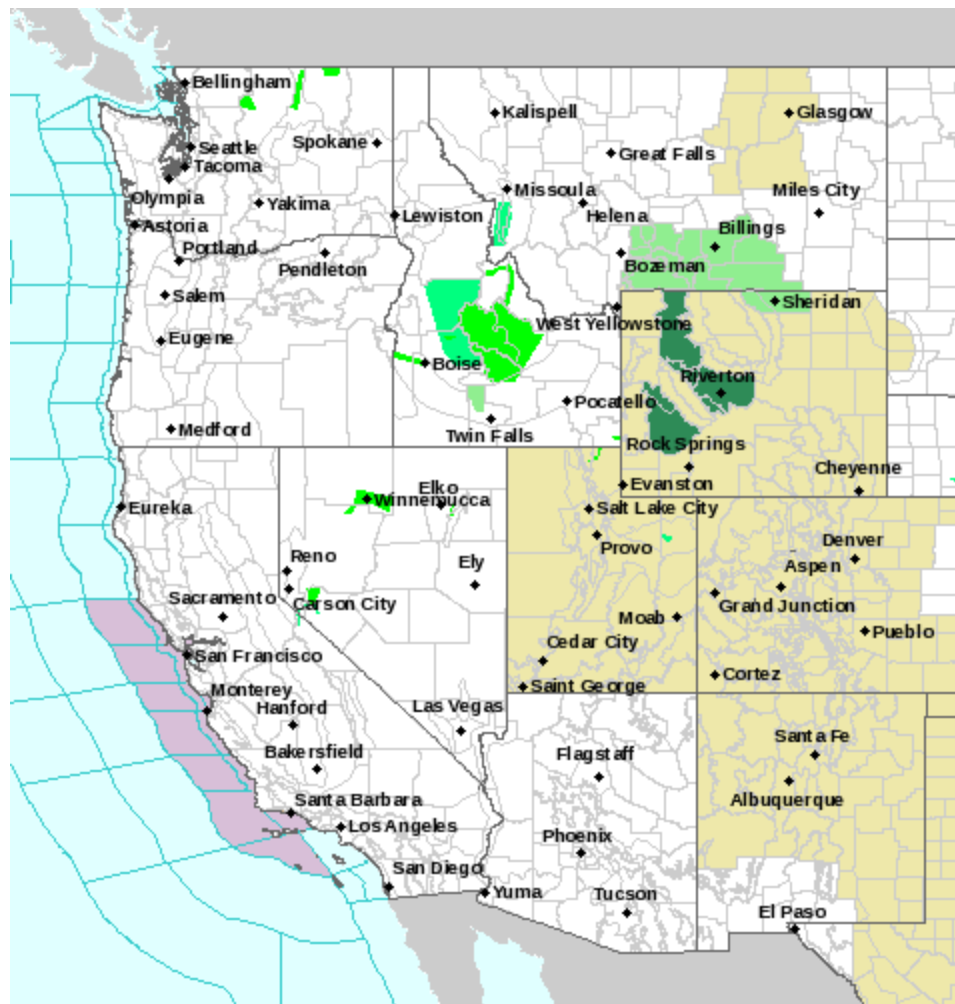

NORTHERN CALIFORNIA

The low pressure trough associated with yesterday's weather system will be moving into the Great Basin today with westerly flow across the Pacific coming over the Northern California right behind it. There will be some residual cloudiness behind this system today, although not so much in the SW quarter of the region. A few light showers will still be possible in the far northern areas yet this morning, but especially this afternoon. Dry, warmer weather will prevail Friday and Saturday under the mentioned westerly flow, but later Saturday and Sunday another low pressure trough will be moving ashore that could bring some more showers to areas north of a line from about Cape Mendocino to Eagle Lake. A few wet thunderstorms could be possible then as well. Early next week dry, warmer weather returns again, but later next Wednesday another low pressure trough may arrive off shore. No significant, unseasonable wind conditions are expected for the next 7 days, although there could be some fairly typical gusty westerly afternoon winds in the western areas daily. Afternoon highs will likely be notably above normal early next week with the warmest inland areas 95-97 or about 10 degrees above seasonable.

SOUTHERN CALIFORNIA

Today will be a transition day from the cool, onshore flow of the past two days toward a warmer and drier weather pattern expected through the weekend. This morning, a deep marine layer will allow for stratus and even some drizzle to occur along the coast and coastal valleys, but this should dissipate well before noon. Expect a sunnier day overall with high temperatures climbing 5-8 degrees over yesterday. Along the central coast, local northwest winds of 15-25 mph will develop this afternoon and again on Friday. By the weekend, most areas should see light winds. High temperatures will climb into the 70s along the coast and in the mountains to the mid 90s in the valleys. Minimum RH will fall into the teens for up to 6 hours each afternoon, beginning Friday, below 6,000 feet. A slow cooling trend may occur next week as a weak trough slips back into the Pacific Northwest. Longer range models indicate a much cooler and windier pattern may evolve the weekend of the 10th. No precipitation is expected through the period.

Cal OES LAW ENFORCEMENT MISSIONS

Closed Cal OES Law Missions

- **2017-LAW-36143, 5/30/17, 1526 hours:** Humboldt Sheriff requested canine teams to search an area around the home of a missing 24 year old male who was last seen on 05/23/17. The home is in the Willow Creek area of Humboldt County. The resources were requested for a search on 5/31/17. Request referred to Cal OES Canine Coordinator. [Update: Canine searches conducted without locating the missing person. Mutual Aid resources released.](#) **Mission Closed**
- **2017-LAW-36175, 5/31/17, 1550 hours:** [IERCC reported a SPOT activation near the Pacific Crest Trail \(PCT\) in San Bernardino County. The registered owner was reported to be on a solo hike of the PCT. San Bernardino County was notified. A Sheriff helicopter located the subject and airlifted him to an airport. He activated the SPOT device because he had been ill for several days and could no longer continue his hike. The subject was evaluated by Fire personnel but refused any further medical treatment.](#) **Mission Closed**

Cal OES MISSIONS

Cal OES Missions

- **2015-IREOC-19846:** One RAWS weather station to Amador OA – Mission completed. Mission closed.
- **2017-SOC-34379:** Technical specialist for spillway floor inspections at Oroville Dam, Butte OA – Demobilizing
- **2017-Cal OES-35819:** Twelve Caltrans engineers requested to conduct damage and site inspections throughout the state for impacts related to 2017 February Winter Storms. The lead engineer will report to the Joint Field Office to coordinate the response.

Presidential Declaration Storms – FEMA-4301-DR-CA & FEMA-4305-DR-CA

- Preliminary Damage Assessments are complete for counties named under Presidential Declaration FEMA-4301-DR-CA and FEMA-4305-DR-CA: Alameda, Amador, Butte, Calaveras, Contra Costa, El Dorado, Humboldt, Inyo, Kern, Lake, Lassen, Los Angeles, Marin, Mendocino, Merced, Mono, Monterey, Napa, Nevada, Orange, Placer, Plumas, Riverside, Sacramento, San Benito, San Diego, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Shasta, Sierra, Siskiyou, Solano, Sonoma, Sutter, Trinity, Tuolumne, Yolo, Yuba

Presidential Major Disaster Declaration - FEMA-4308-DR-CA

- Assistance for emergency work and the repair or replacement of disaster-damaged facilities: Alameda, Alpine, Amador, Butte, Calaveras, Colusa, Contra Costa, Del Norte, El Dorado, Glenn, Humboldt, Kings, Lake, Lassen, Marin, Mariposa, Merced, Modoc, Monterey, Napa, Nevada, Plumas, Sacramento, San Benito, San Joaquin, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Shasta, Sierra, Siskiyou, Solano, Sonoma, Stanislaus, Sutter, Tehama, Trinity, Tuolumne, Yolo, and Yuba Counties.
